Skills

- **Languages :** Java | JavaScript (ES6+) | TypeScript
- **Frontend :** HTML | CSS | SCSS | Tailwind CSS | React.js
- **Backend :** Node.js | Express.js | REST APIs | Socket.IO
- **Database :** MongoDB | MySQL | Redis | Elasticsearch
- **Cloud & Deployment :** Render | Vercel | MongoDB Atlas| Cloudinary | ImageKit.io
- **AI Tools :** ChatGPT | GitHub Copilot | Claude | Gemini
- **DSA :** 250+ LeetCode Problems | 150+ Day Streak | Java

Experience

Associate Software Engineer | Cavisson Systems, Noida May 2025 – Sept 2025

- Core member of the UI team on **NetDiagnostics** . An enterprise real-time network monitoring product. Working on feature additions and performance optimisations on an existing large-scale system.
- Built and maintained 10+ reusable React components for monitoring dashboards using custom hooks, memoisation, and lazy loading for smooth performance on high-frequency live data.
- Integrated REST APIs and modified Node.js endpoints and application logic to support data flows between frontend components and backend services; debugged issues and transformed API data for application use.
- Developed and optimized Elasticsearch queries and aggregations for diagnostic reports and dynamic data-driven views, while collaborating with frontend and backend teams to investigate data and integration issues.
- Modified application code to support OpenTelemetry instrumentation and worked with logs, metrics, and traces to improve observability and troubleshoot application behavior.

Frontend Developer Intern | Softapper Tech Solutions, Greater Noida Sept 2024 – Dec 2024

- Built responsive UI screens using HTML, CSS, JavaScript, and React. Developing reusable components, animations, and creative layouts for client-facing projects.
- Collaborated in a consultancy team to brainstorm and pitch frontend ideas, contributing to UI/UX improvement discussions and deliverable strategies.
- Implemented creative UI concepts including micro-animations, illustrations, and polished layouts to enhance overall user experience.
- Leveraged AI tools (ChatGPT, Copilot, Gemini) to boost productivity and streamline repetitive frontend tasks.

Projects

ConvoX | Real-Time Messaging Application **Github | Live Demo**

- Developed a full-stack, real-time one-to-one messaging application with JWT authentication, online/offline presence, and instant message delivery using Socket.IO.
- Built REST APIs for messaging and contact management, incorporating input validation, rate limiting, and error handling.Integrated image sharing and management using Cloudinary and automated welcome emails with Resend.
- Tools Used: MERN Stack | Socket.IO | Zustand | Tailwind CSS | DaisyUI | Cloudinary

ResumeIQ | AI-Powered Resume Analysis Platform **Github | Live Demo**

- ResumeIQ is a full-stack, AI-powered career platform built using the MERN stack and Google Gemini API. It helps users analyze their resumes, identify skill gaps, and receive personalized career recommendations and interview preparation insights on the basis of targeted job role.
- Tools Used: MERN Stack | SCSS | REST APIs | Context API | Puppeteer | Generative AI (Google Gemini API)

Education

ITS Engineering College | AKTU, B.Tech in Computer Science Oct 2021 – June 2025

- CGPA: 8.0
